Topic 7: Document Ingestion

Simple RAG Project - Requirements Guide

Identify exactly which document and data sources the project accepts.

What this topic requires

PDF, TXT, DOCX, CSV, web pages, database records, or other sources must be confirmed from the implementation rather than assumed.

Required understanding and workflow

1. List supported file types and sources.

2. Name each loader.

3. Explain the loader output structure.

4. Describe metadata captured.

5. Mark unsupported sources as not implemented.

Workflow

```
Source -> loader -> documents/pages/records -> normalized content
```

Evidence rule

Describe implementation only after repository inspection. Missing features must be labeled NOT IMPLEMENTED IN THIS PROJECT. Recommendations must be labeled PRODUCTION RECOMMENDATION - NOT CURRENTLY IMPLEMENTED.
