Topic 9: Text Chunking

Simple RAG Project - Requirements Guide

Explain chunks, chunk size, overlap, and their effect on retrieval quality in beginner-friendly language.

What this topic requires

The final documentation must report the exact chunk_size and chunk_overlap from code when available, and explain the consequences of large or small chunks.

Required understanding and workflow

1. Find the splitter implementation.

2. Record exact size and overlap values.

3. Show a short chunking example.

4. Explain context continuity.

5. Relate chunk settings to retrieval quality and token cost.

Workflow

```
Long text -> splitter -> chunk 1 + overlap -> chunk 2 + overlap -> chunk N
```

Evidence rule

Describe implementation only after repository inspection. Missing features must be labeled NOT IMPLEMENTED IN THIS PROJECT. Recommendations must be labeled PRODUCTION RECOMMENDATION - NOT CURRENTLY IMPLEMENTED.
