Topic 11: Vector Database

Simple RAG Project - Requirements Guide

Explain the actual vector database and why it is used.

What this topic requires

Describe stored vectors, chunks, metadata, IDs, collections or indexes, and the difference between normal database lookups and similarity search.

Required understanding and workflow

1. Identify the vector technology.

2. Find collection/index configuration.

3. Describe stored records.

4. Explain persistence and lifecycle.

5. Mark absent databases clearly.

Workflow

```
Chunk + vector + metadata -> collection/index -> similarity search
```

Evidence rule

Describe implementation only after repository inspection. Missing features must be labeled NOT IMPLEMENTED IN THIS PROJECT. Recommendations must be labeled PRODUCTION RECOMMENDATION - NOT CURRENTLY IMPLEMENTED.
